Bug in use case <01> <Register as an agent being anonymous>

Description

Advertisement's validator doesn't control if the username already exists in the system. It gives a generic error when you fill an existing username.

Results

The tester found the error because it was controlled at the acceptance tests.

Bug in use case <02> <Create, edit and delete an advertisement being an agent>

Description

The 'cancel' button on the form redirects to the welcome page instead of the advertisement list

Results

The tester found the error because it was controlled at the acceptance tests.

Bug in use case <02> <Create, edit and delete an advertisement being an agent>

Description

The advertisement validator doesn't control that the expiration month isn't the current

Results

The tester report that doesn't work but he or she doesn't see what's wrong.

Bug in use case <03> <List the own advertisements being an agent>

Description

The column start moment isn't displayed.

Results

The tester found the error because it was controlled at the acceptance tests.

Bug in use case <06> <List the taboo advertisements being an administrator>

Description

The column start moment isn't displayed.

Results

The tester found the error because it was controlled at the acceptance tests.
