Notes	<i>We are doing the acceptance test within the same group because the group we originally were going to do them with has decided to drop out at the last minute and we cannot find anyone else to replace them.</i>
	<i>We are aware this is not optimal, but we have no choice. At the very least we have taken the precaution of making sure that the person who tests the project is whoever has been least involved with the development of that project in particular, to ensure that it's properly tested.</i>
